0.1 Introduction

This data base related to art and movies. More or less everyone watch movies to kill their boredom, to watch and learn new things. This database help those user to find new movies like what kind of movie they like. There are a bunch of database like these like imdb.com, rottentomatoes.com and etc but the user have to open 3 or 4 websites to watch movie trailers, Reviews,Cast Crew, Genre, Run-Time, Different Movie Suggestions. So this database project started with the intention of developing a one-stop destination for the user to view all the data. Like

- User Can Watch Movie Trailers

- imdb Rating, Rottentomatoes Ratings.

- User get notified the Release Date of their favorite type of movie.

- User Friendly Movie Suggestions

- Users can watch and give reviews ETC.

User can easily get this benefits from this database.

0.2 Object

- User Can easily get the movie which they want to watch.

- User can get to know about the release date of a movie.

- User can give reviews and rating about a movie.

- User can make comment about a movie whether they like the movie or not

- This is a Customize Database System. User can log in to their Account and add movies to their Watch list.

- Users Can also Upload their Short Films.

0.3 Target Users

- Users who are trying to find the good movies like their choice can easily through this Database System.

- Users who are trying to upload their Short Films are easily Can upload their Short Films in this Database System.

0.4 Database Feature and Description

The web page will open with the user view at first. Anyone who will log in with their User Name and Password Can get into in this Database System. Once an user access with their necessary information they can:

- Watch the upcoming movie list.

- Can follow friends and see their watch list and grind new movies.

- Give Reviews about Movies.

- User Can upload their Short Films.

- Notification for Movie Related News.

0.5 Tools and Resources

- HTML

- JAVASCRIPT

- MySQL

- PHP

- Web Server

- XAMPP

0.6 Benefits

More or less we all watch movies to enjoy our free time or learn about something different.Many of us using three or four sites to get all information together. But in this Database the user can avoid all hustle to get the desire information together. User can make their personal Watch list and follow other user's watch list so that they can get to know about more films and User can also give us feedback to improve the Database more properly.

0.7 CHALLENGE

As we all know, this will be a big Database system and we have to keep it in updating frequently. SO, Cost will be the thing for us. Users have to present with their proper information and we have to keep digging if the user provide the authentic information or not. Lastly, it would be difficult for us to maintain this Database but not impossible, obviously.
